

Pizza Sales

Analysis

Using SQL

Presented by Shivani

About this Project :

Hello, My name is Shivani and in this project I have utilize SQL Queries to solve questions that were related to Pizza Sales.

In the bustling world of culinary delights, pizza stands out as a perennial favorite. Our project aims to analyze and manage pizza sales data using SQL, providing insights into customer preferences, sales trends, and operational efficiency.

Objective: The primary objective of this project is to leverage SQL to analyze sales data from pizza orders. By querying a relational database, we aim to uncover patterns that can optimize inventory management, improve customer satisfaction, and boost profitability.

Queries :

Basic:

- Retrieve the total number of orders placed.
- Calculate the total revenue generated from pizza sales.
- Identify the highest-priced pizza.
- Identify the most common pizza size ordered.
- List the top 5 most ordered pizza types along with their quantities.

Intermediate:

- Join the necessary tables to find the total quantity of each pizza category ordered.
- Determine the distribution of orders by hour of the day.
- Join relevant tables to find the category-wise distribution of pizzas.
- Group the orders by date and calculate the average number of pizzas ordered per day.
- Determine the top 3 most ordered pizza types based on revenue.

Advanced:

- Calculate the percentage contribution of each pizza type to total revenue.
- Analyze the cumulative revenue generated over time.
- Determine the top 3 most ordered pizza types based on revenue for each pizza category.

Retrieve the total number of orders placed.

```
SELECT  
    COUNT(order_id) AS total_order  
FROM  
    orders;
```

GROUP BY pizzas.size
ORDER BY order_count DESC;
```

The screenshot shows a 'Result Grid' window with a table containing two columns: 'size' and 'order_count'. The data is sorted in descending order of 'order_count'. The rows are: L (18526), M (15385), S (14137), XL (544), and XXL (28). There are navigation icons at the top of the grid.
